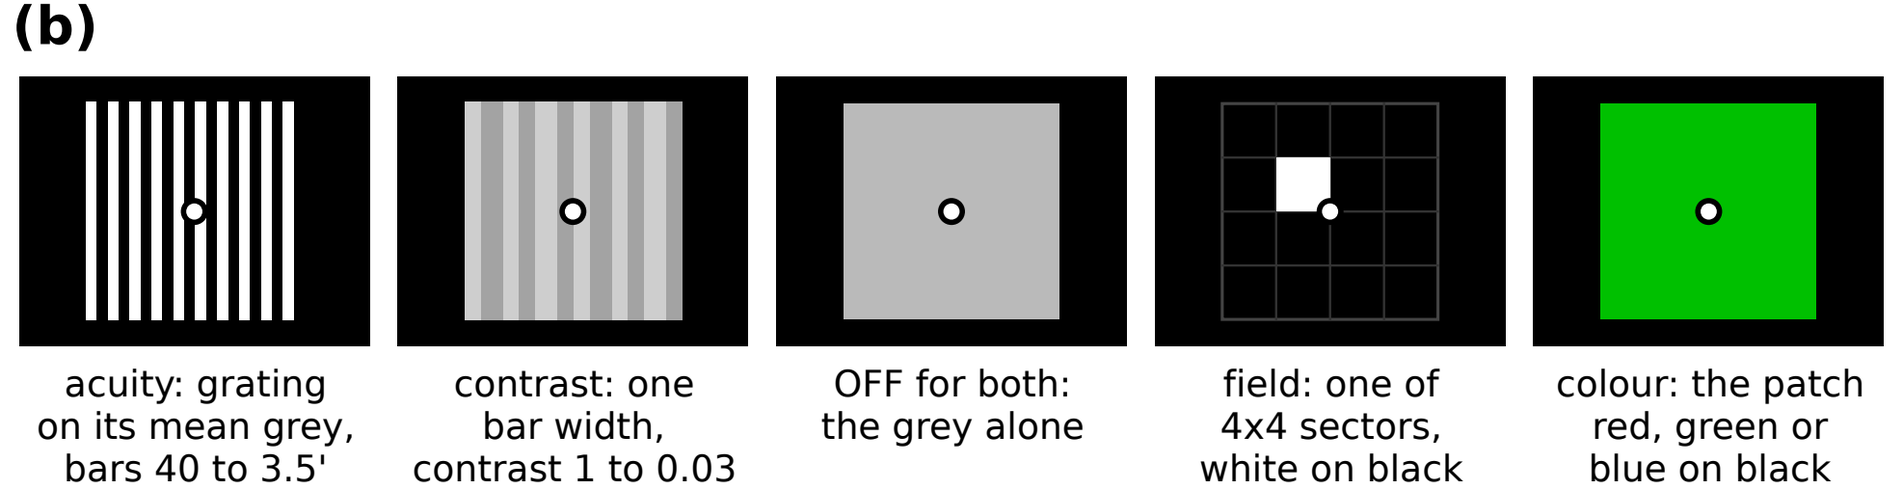
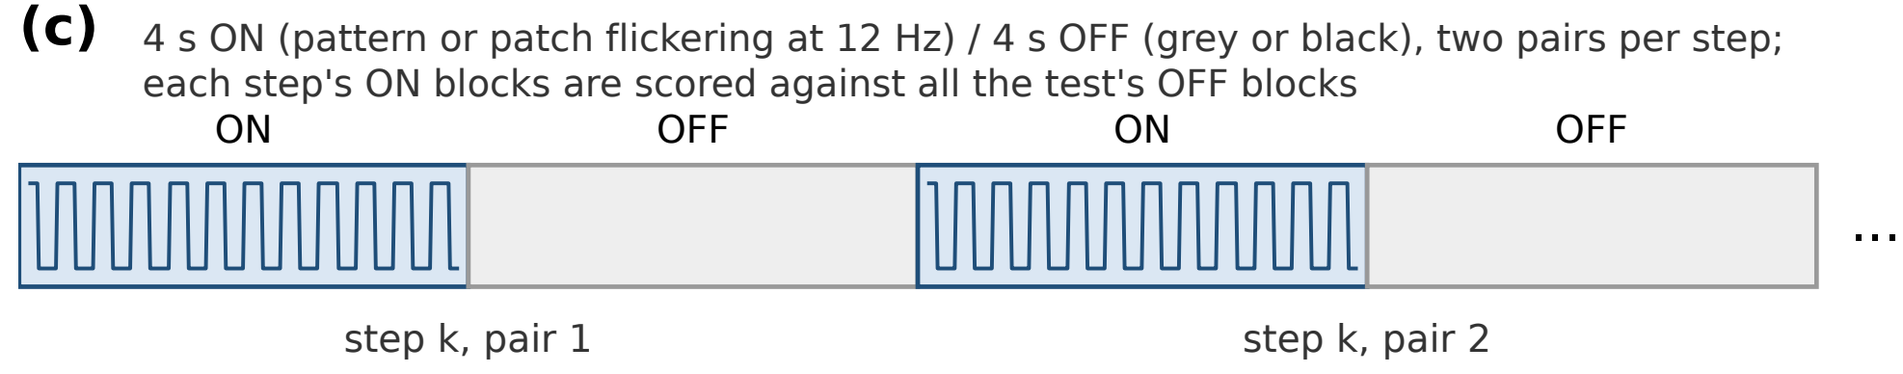
(a)
Muse 2 headband
TP9, AF7, AF8, TP10
+ cup electrode at Oz
256 Hz over Bluetooth
phone
MuseLog app
raw EEG as OSC
over Wi-Fi, UDP 5000
PC driver
xr_session.py --mode exam
records, logs every frame,
scores each test
Quest 3S browser
stimulus page
frame-exact flicker
(12 Hz at 72 fps)
WebSocket
over USB
phantom subject: the same path with a synthetic
EEG that follows the logged stimulus
(the gate, no hardware)
read-out
thresholds, field map,
exam_report.pdf
subject
one eye covered,
eyes on the dot



(b)
acuity: grating
on its mean grey,
bars 40 to 3.5'
contrast: one
bar width,
contrast 1 to 0.03
OFF for both:
the grey alone
field: one of
4x4 sectors,
white on black
colour: the patch
red, green or
blue on black



(c)
4 s ON (pattern or patch flickering at 12 Hz) / 4 s OFF (grey or black), two pairs per step;
each step's ON blocks are scored against all the test's OFF blocks
