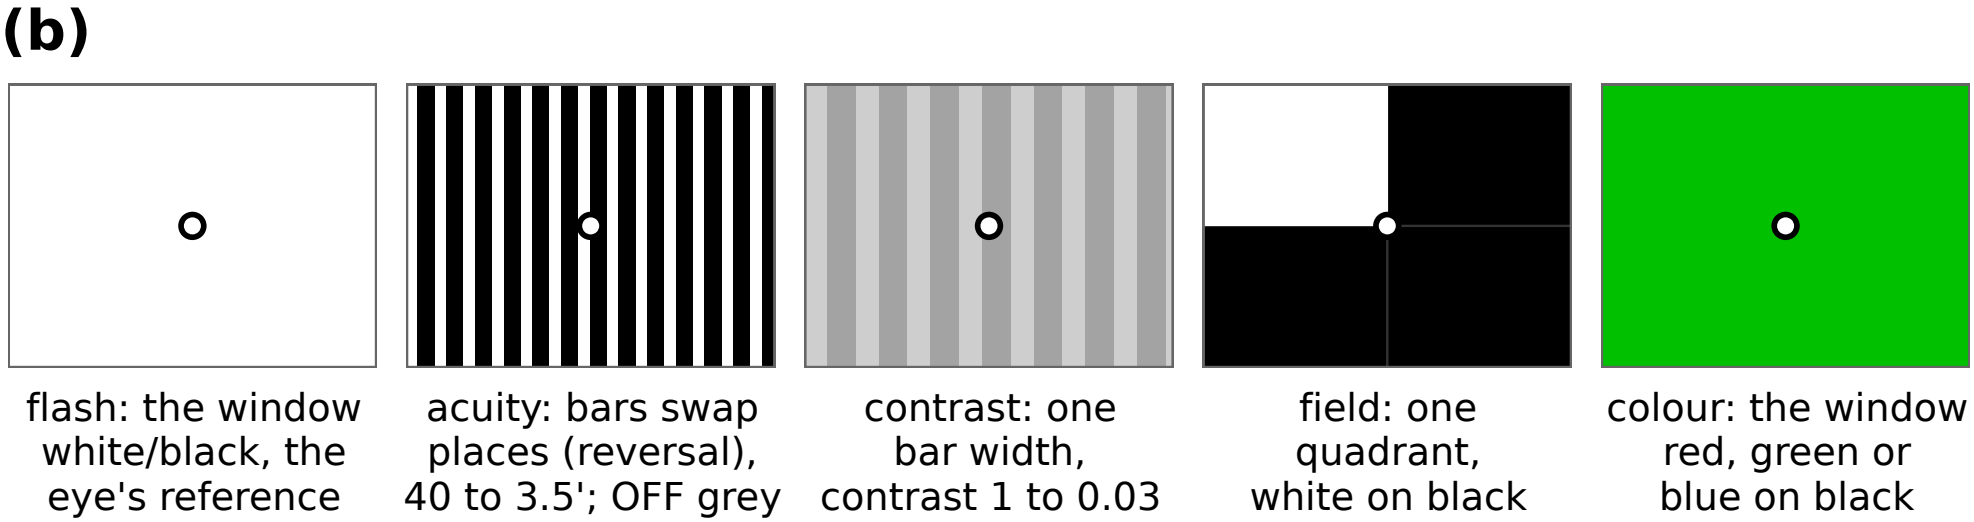
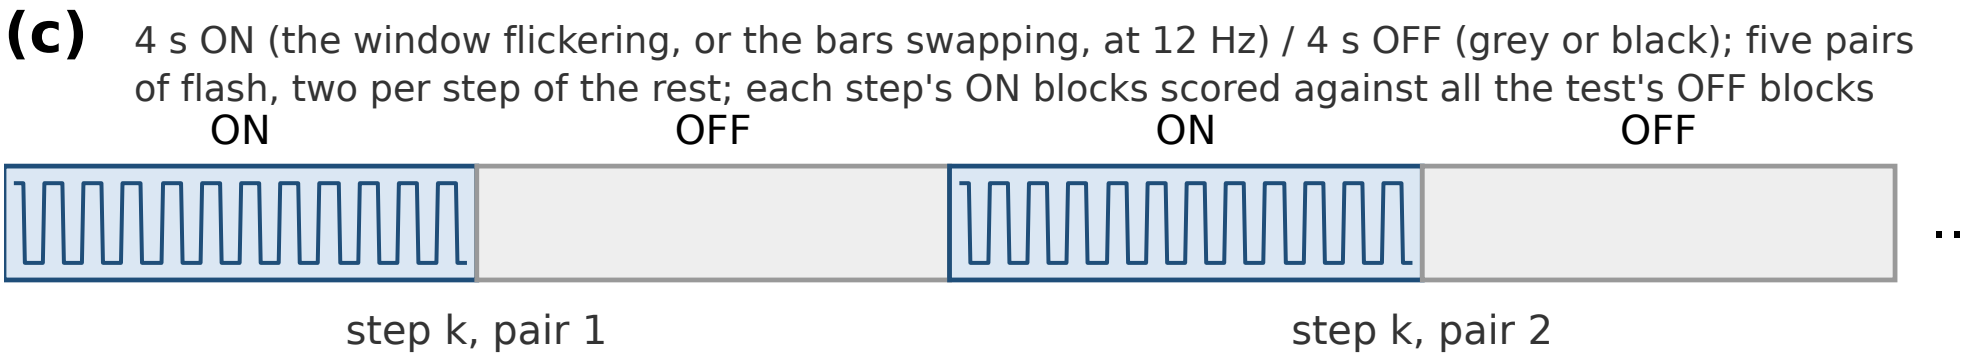
subject
one eye covered,
eyes on the dot
phantom: the same path with a
synthetic EEG that follows the
logged stimulus (the gate)



(b)
flash: the window
white/black, the
eye's reference
acuity: bars swap
places (reversal),
40 to 3.5'; OFF grey
contrast: one
bar width,
contrast 1 to 0.03
field: one
quadrant,
white on black
colour: the window
red, green or
blue on black



(c)
4 s ON (the window flickering, or the bars swapping, at 12 Hz) / 4 s OFF (grey or black); five pairs
of flash, two per step of the rest; each step's ON blocks scored against all the test's OFF blocks
